

NEW!

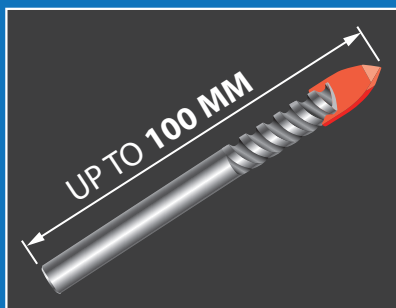

TILES & GLASS DRILL BIT

**BETTER
FASTER
TOUGHER***

The solution for hard and delicate materials

LENGTH

- Longer total length
- New bright and smooth finish

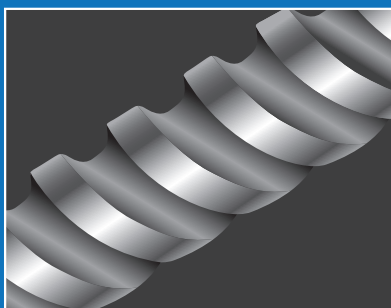

Benefits

- Allows drilling into deep materials
- Suitable for more applications
- New Diager design

Advices

Only use in rotation – no percussion / Suitable for dry use – Low speed (rpm) and water cooling improve the lifetime of the drill bit respect advised rpm to get long lifetime / Do not swing during drilling.

FAST SPIRAL

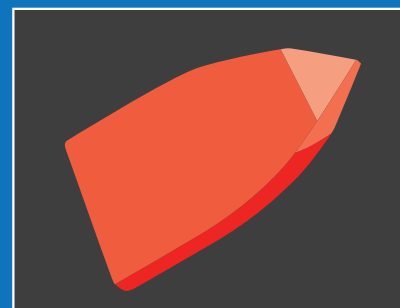

- Fast spiral
- Tightened pitch

Benefits

- Speed up dust removal
- Better in deep materials

NEW DESIGN CARBIDE TIP

- Made in europe high hardness carbide tip
- New 4 faces carbide tip design
- Strong cutting edges
- Copper brazing

Benefits

- Accurate drilling precision
- Better penetration results
- Drilling through tiles up to class 3
- Dry and wet applications
- Better resistance to friction

Materials No tempered glass - Brick - Tile - Ceramic - Plastic - Composite

Ref.400

Diameters : 3-4-5-6-6.5-7-8-9-10-12-13
