

# NEW! THE DECK FLOORING DRILLING SET

## DRILLING COUNTERSINKING

### Advantages

- Guarantee from a clean and regular work for the installation of hard wooden terrace.
- Countersink Carbide Tipped for a long life time.
- Depth-Stop in metal offers a large robustness.
- Its plastic ring free in rotation, stops in the contact of a wood's piece which avoid any marks on blades.
- The depths of drilling and countersinking can be exactly adjusted.

**CLEAN WORK  
ANY MARKS**

### THE COMPLETE SET

### Materials

- Exotics wood
- Hard wood

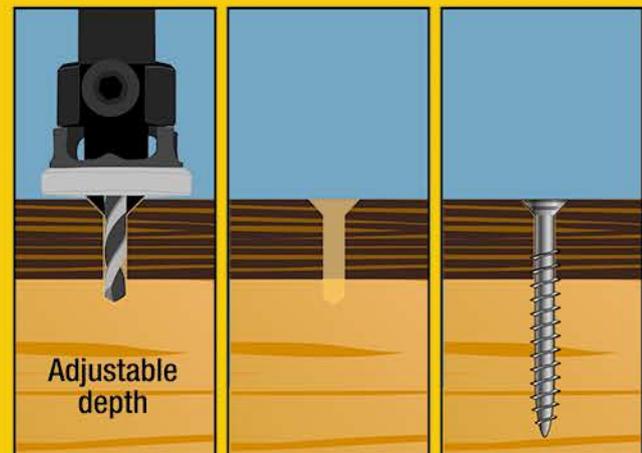

Compatible with all special terrace screw

### Tips

More the wood is hard, more the hole diameter must be close of the screw diameter.

For an optimal evacuation of scratches and for a bigger longevity, place the bottom of the flute with the release of the countersink.

A first drilling is recommended for the hard woods.
